Small Platform Table Top 2' x 3' Travel

Our small platform CNC machines are built for accuracy and precision for 2D and 3D cutting. These machines are made from a combination of precision aluminum extrusions and machined 6061 Aluminum. They can be used for production cutting and/or Prototyping with applications includes Foam, Plastics, Carbon Fiber, Wood, Aluminum, Brass and many others. Call one of our representatives to find out about your specific material. Our desktop CNC machines are built with high tolerance ball screws, rigid linear guide ways, and large DC servo motors with high encoder counts for precision movement. They are all manufactured and assembled in USA by highly trained and skilled technicians. Custom Machines are available upon request, call us for a price quote.

[Prev](#)[Next](#)**Model: KG3925****Starting At: \$8,095 (USD)**

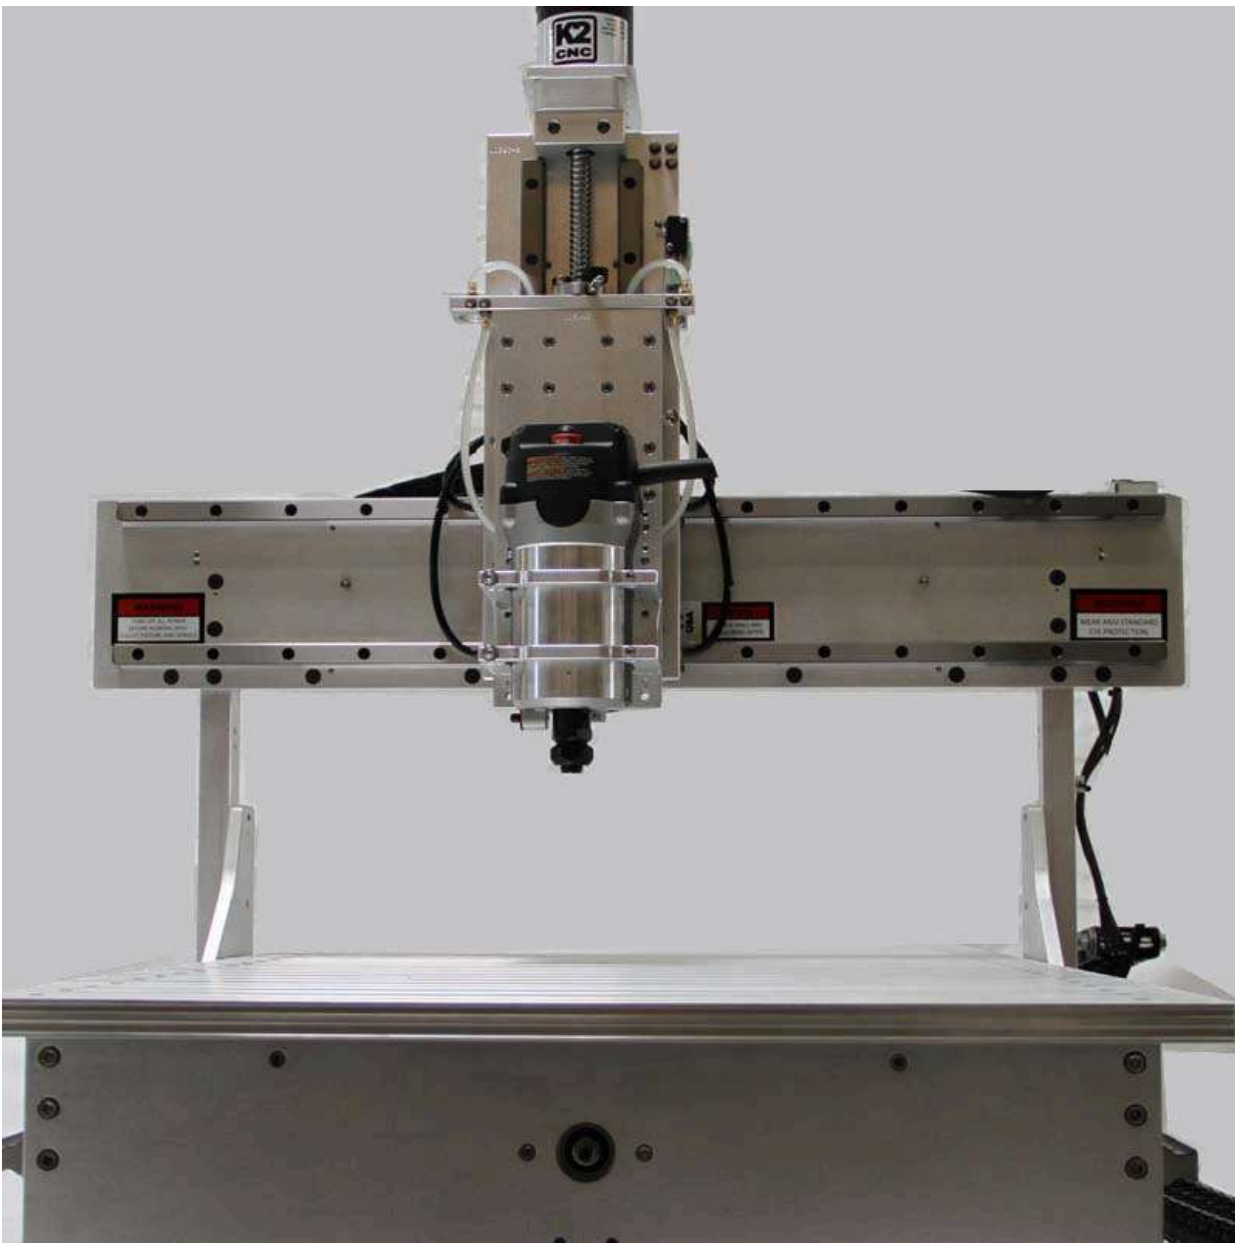

Included with Purchase:

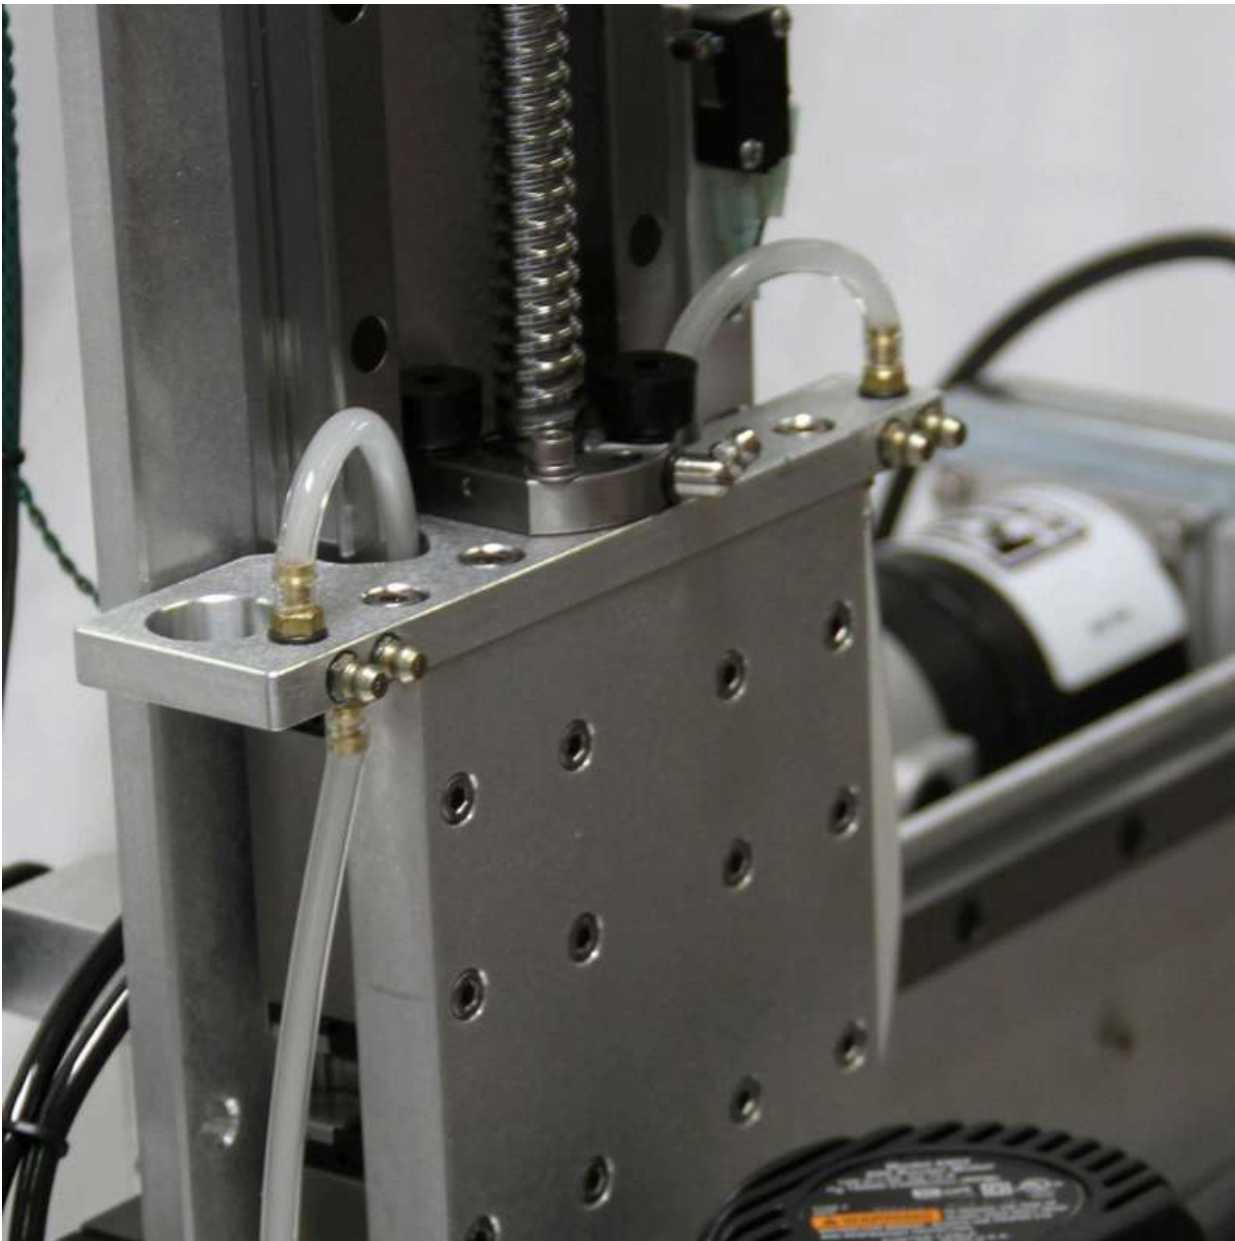

- **KG3925 CNC Machine**
- **K2MC Computer with Control Software**
- **Servo Motor and control Box**
- **T-Slot Table Top**

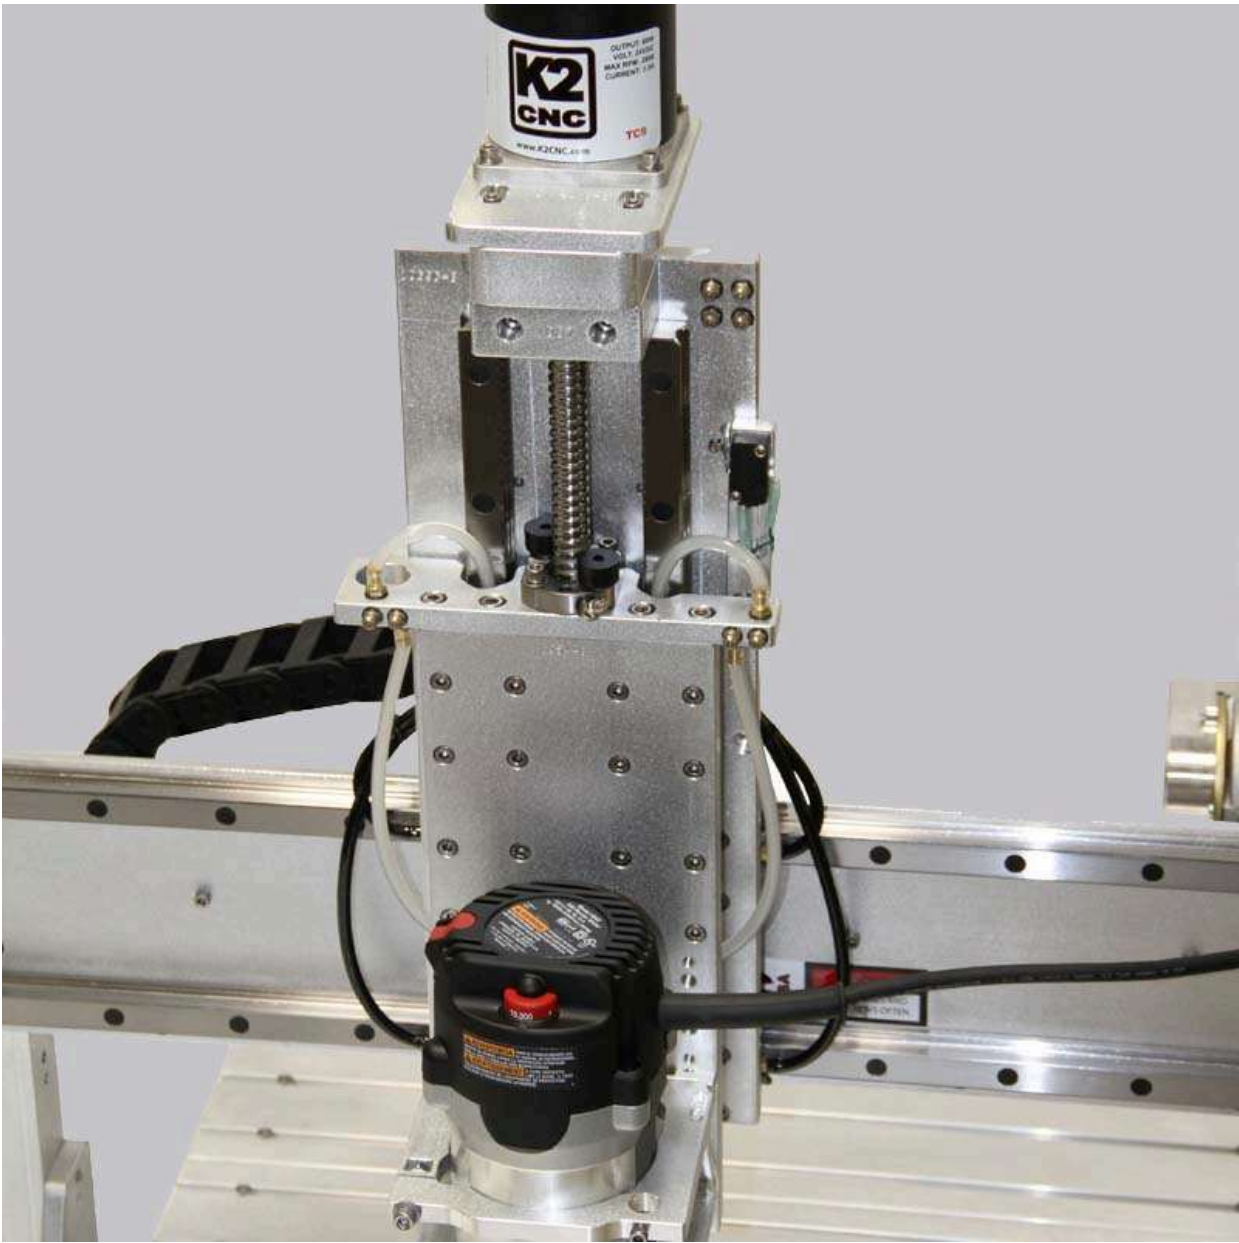

Machine ships fully assembled, tested and boxed in a wooden crate. Shipping & handling and the wooden crate are at additional charges. The price includes the above stardard items. Items under Optional Equipment are not included in this price.

Specifications

MACHINE	KG3925
Travel (Inches)	39"x25"
Z Axis Travel	7"
Clearance	5"
HD Model	Upgrade
HD Z axis	5", 8" or 12"
Footprint	50" length x 32" width x 40" height
Motors	DC Servo motor with encoder
Drive Type	Precision Ballscrews
Ballscrew size	16mm
Ballscrew pitch	5mm

Standard Equipment

CNC Frame

K2CNC frame is made of 6061 machine grade aluminum and 8020 extrusions. The frame is precision machined from large format CNC machines in Orange, Ca. The frame includes rigid linear guide ways, precision ball screws , easy access grease ports, Cable carriers, and Home switches. It comes with a Z axis of 5" of clearance and 7" of travel. The standard frame is designed to hold a router only or light weight products 8lbs. or less . A HD upgrade is required to mount a spindle or aggregates over 8lbs.

Control Box

Our K2MC Control box is made with a DSP based motion control board with custom servo drives. Our control box gets accurate real time feedback of positioning keeping your system fully closed loop. The machine comes standard with DC servo motors with 1000 line encoders allowing for precision

Guideways	Precision LM guide ways
Guideways	20mm
Control Software	K2MC
Operation File type	Standard G-Code
Tabletop size	48" x 24" X 0.75"
Repeatability	+/- 0.001"
Positioning	0.0001"
Rapid Speed	200 IPM
Cutting Speed	150 IPM
Power Requirements	110V/220V 15Amps

movements. K2MC control box connects via USB drive and runs on 64 bit computers.

Computer & Control Software

Included are K2MC control software installed on a new computer specially configured to operate your machine and fully tested prior to shipping.

T-Slot Table Top

K2CNC's T-slot table top is designed for the end user to easily create clamping solutions. The plate is 3/4" thick and has slots spaced 2" apart. The slots are designed to fit 1/4-20 bolt heads or nuts to allow you to fixture your parts many ways and easily.

Optional Equipment

Frame Upgrade

Upgrade your machine to a Heavy Duty (HD) model: The HD model gives your machine more rigidity and allows you to mount an industrial-grade spindle. The HD model includes added bearings with two bearings on every rail with added support beams and heavier weight pieces. The HD upgrades are: HD5, HD8, and HD12 (number represents the clearance of the Z axis)

Spindle Options

Router options:

Porter Cable 893: Spindle Package - Includes:

- A. Porter Cable 892
- B. On/Off relay
- C. Router mount

Bosch Colt: Spindle Package includes:

- A. Bosch Colt Spindle
- B. On/Off relay
- C. Router mount

Porter Cable 7518: Spindle Package - Includes:

- A. Porter Cable 7518
- B. On/Off relay
- C. Router mount

Industrial Grade Spindle options :

HSD-MT1073-140: Spindle Package - Includes:

- A. HSD MT1073-140 Spindle with a 3Hp VFD controller,
- B. On/Off Control,
- C. Spindle Speed Setting

Colombo RS73: Spindle Package - Includes:

- A. Colombo RS73 Spindle with a 3Hp VFD controller,
- B. On/Off control,
- C. Spindle Speed Setting

The router must be a Heavy Duty (HD) model in order to have an industrial-grade spindle. These spindles are 220VAC. Spindles which are 3 Horsepower (HP) or less can be single or 3 phase and any spindle over 3HP must be wired 3 Phase. Spindles provide better constant horsepower throughout cutting, lower run-out, a quieter operation and capable of continuous cutting for over 8 hours a day. Production users should consider industrial grade spindles over router type spindles.

CAD / CAM Software

Our machines are compatible with almost every CAM/CAM software out there that support G-Code posting. We offer the following software and can be packaged with your machine.

1. **Rhino CAD:** www.rhino3d.com
2. **Rhino CAM:** www.rhinocam.com
3. **Visualmill:** www.mecsoft.com
4. **Aspire:** www.vectric.com
5. **V-Carve:** www.vectric.com

Table Top Options

Vacuum Table Top (Grey PVC with 2" grid pattern)

Machine Enclosure

Table Legs
Full Enclosure

Vacuum Hood

Spring loaded 2 1/2" Vacuum Hood with clear vinyl brush
Spring loaded 2 1/3" vacuum Hood with hair brush

Accessories

3 Piece end mill set
2 Piece ball end mill set
Part hold down clamps
